

EnerSys®

Power/Full Solutions

an EnerSys Company

Services

“

We are the experts on our products and solutions. Our specialised skills deployed locally and nationally ensure our Clients get maximum benefit from their investment. Our skills and capabilities extend beyond product knowledge to include our Clients' associated assets to maximise their outcomes.

”

Shelters

ICS provides **turn-key solutions** for your Shelter and Cabinet requirements. We provide design, engineering, and certification, then supply and install through to handover then maintenance.

Energy Storage

EnerSys have **market-leading products** to supply all your Energy storage solutions. We provide design, install and commission services then maintain and refurbish.

Alternate Energy

EnerSys energy systems and ICS Shelters combine to supply your **Green Energy solutions**. We provide design, installation and commission services then maintain and upgrade.

Portable Solutions

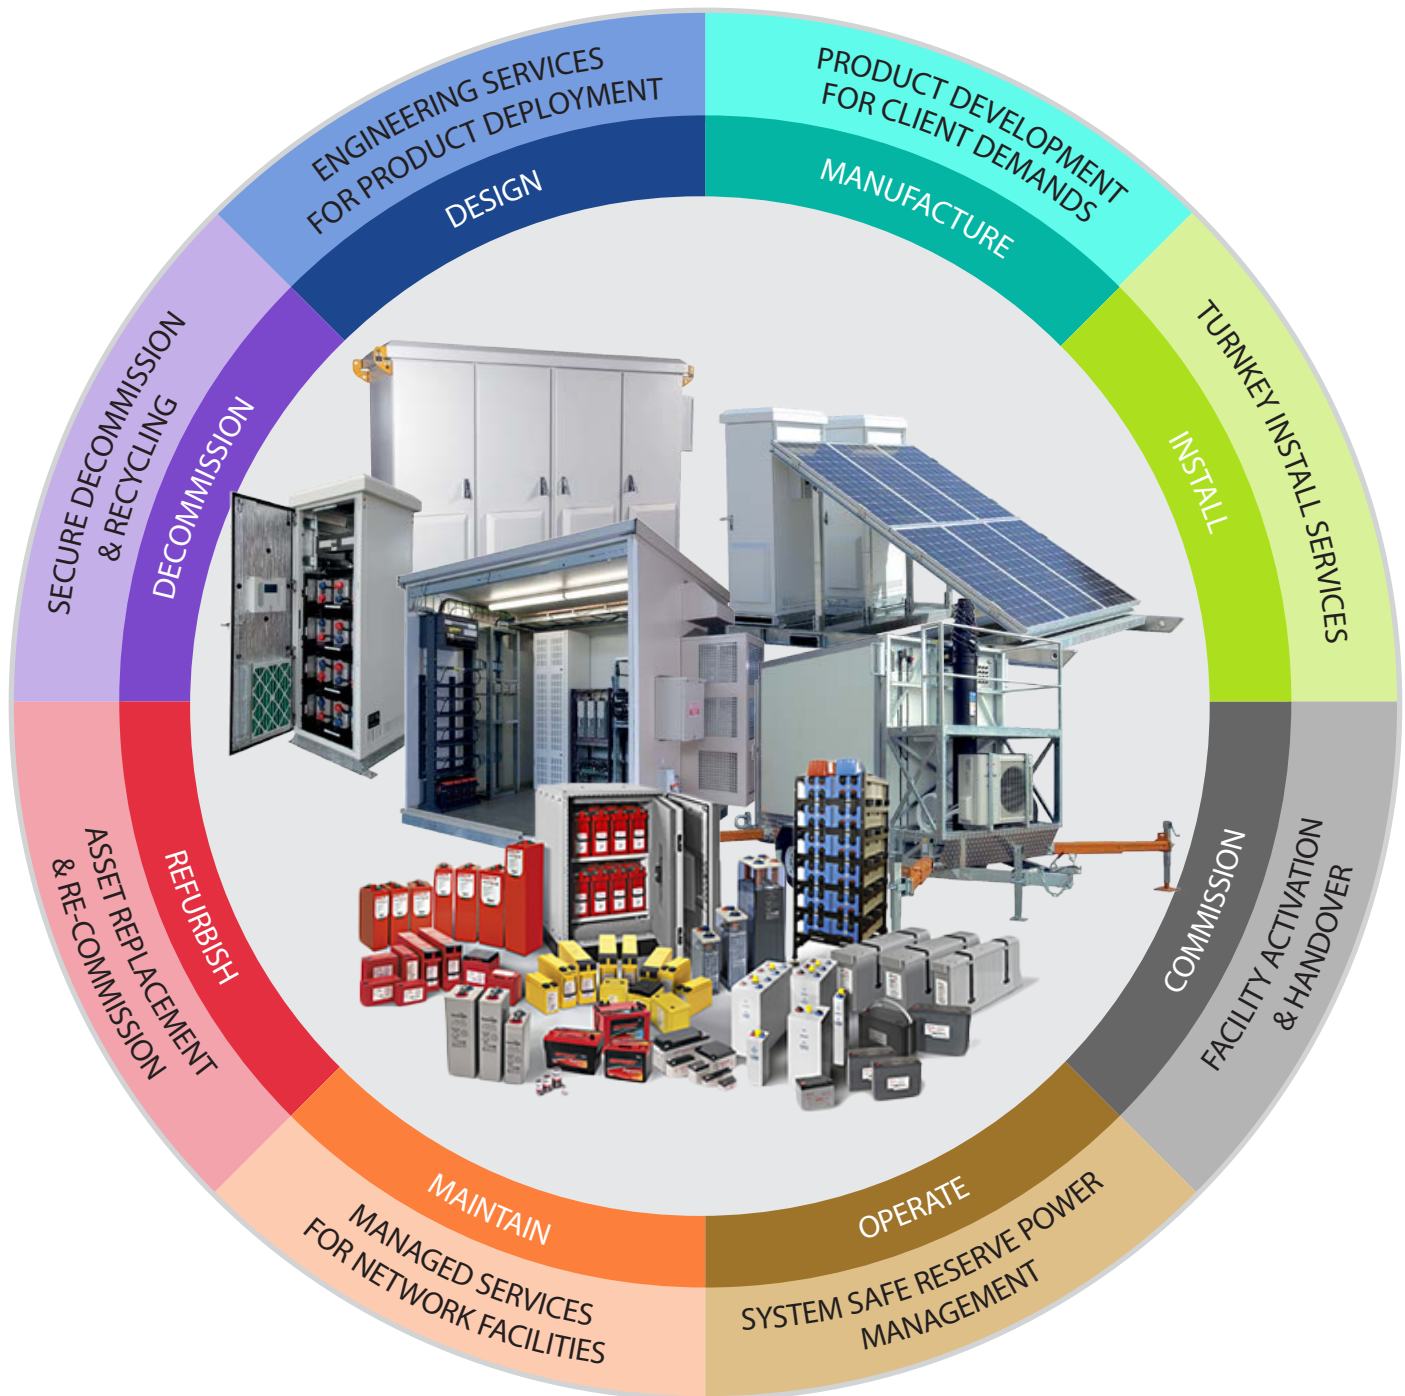

We provide **turn-key support of all portable solutions** including fleet management, deployment and integration, decommissioning and removal, maintenance and refurbishment, storage and national logistics.

Engineering and Design

We provide a range of detailed **technical engineering services** that ensure our products are **deployed securely and efficiently**.

Our Purpose is to ensure our Client's obtain maximum benefit from our installed Products.

Our Products are central to our Services

Our Services

Engineering Services for Product Deployment

From site surveys to design review, property and planning, and design certification we ensure the selected products matches the design and is installed to meet Client specifications. Our National Project Management team manage program roll-outs to ensure a nationally uniform deployment, safely, on time and within budget to quality standards.

Product Development for Client Demands

We work side by side with our clients and our Product groups to advance the design of the selected products, shelters, and equipment so that the final deliverable is easily installed, maintainable and satisfies the Clients' specification.

Turnkey Install Solutions

We take responsibility for deploying our products from factory or warehouse and installing at our Clients' site. From exterior ground-works, foundations, pit and pipe, earth grids, to internal electrical and mechanical installation including cable tray systems, electrical equipment, and air conditioning systems.

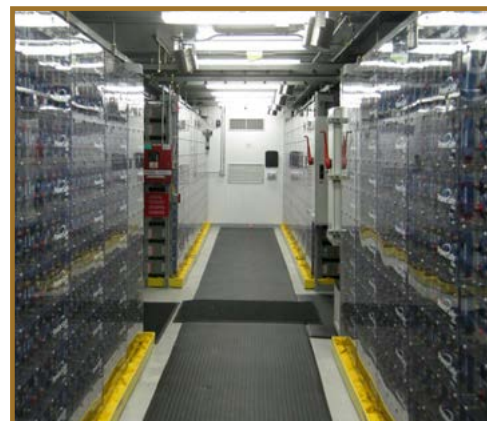

Facility Activation & Handover

We take the installed equipment from inactive to active, ready for the integration by the Client. We commission all facility elements, electrical supply, reserve power systems, including standby generation and ensure alarm and monitoring systems are operative.

System Safe Reserve Power Management

EnerSys complete telecommunications DC power systems from start to finish. Prior to installation, we can provide power systems engineering to optimize the right product for your application.

Whatever your system requirements - 24V and 48V, rectifiers, converters, distribution, alarms - we have the expertise and resources to handle it. We can also install any ancillary equipment needed to complete your system, including racking, cables, ladders and other hardware.

Managed Services for Network Facilities

Our clients rely on our engineering, maintenance, and program management skills to coordinate routine maintenance and breakdown response for the full suite of EnerSys and ICS products and Client equipment that is dependent upon reliable power and facilities. Our services are tailored for each client carried out by ICS technicians and our broad subcontractor base.

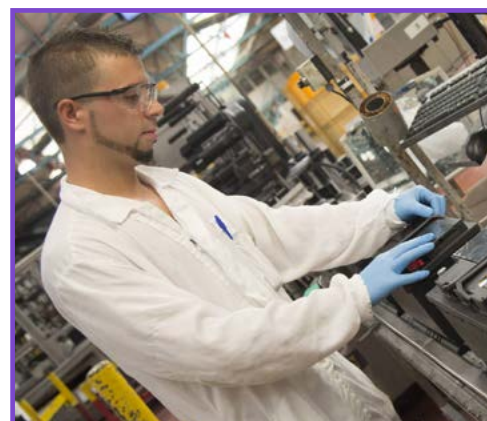

Asset Replacement & Re-Commission

As the installed products reach their end-of-life we seamlessly remove aged equipment and provide the latest products and system upgrades. Our skilled technicians are trained in our products to ensure no disruption to client systems.

Secure De-Commission & Recycling

We have deep knowledge of our products through to end-of-life. We decommission retired equipment without risk to Client plant integrity and then maximise the recycling opportunity.

Capabilities and Experience

Our Markets Services we provide in industry sectors

National and Regional Capability

ICS has the capability to provide total turn-key solutions for your requirements, from design and engineering including sign off, through to supply and installation.

Safe • Efficient • Compliant

ICS's Occupational Health and Safety (WHS) Management System ensures compliance with legislative requirements, OHS procedures and safe systems of work. ICS's WHS Management System, provides confidence that our services will be delivered safely and effectively across all of our practice areas.

To ensure a safe, efficient and auditable approach to project execution, ICS continually invests and improves in its key management systems (including project management, occupational health and safety, quality management, field operations and data management systems). The combination of ICS's staff expertise, experience and efficient management systems ensures that our projects are carried out to a very high standard in a cost-effective and timely manner.

EnerSys and ICS provide tailored services to our Clients focussed on our products and their performance. We ensure our Clients get the maximum benefit from their installed assets and that our products perform to their expected life cycle.

*Leaders in the design, engineering,
construction and servicing of
transportable equipment enclosures.
We have supplied over 8,000
enclosures, 1,000,000 batteries
and reserve power units across a
range of industries and applications...*
